PROFIL

Software Engineer with 5 years of experience in building high-performance web applications. Self-motivated and detail-oriented, I am passionate about modern technologies and combine strong analytical skills, agile teamwork, and a sense of responsibility to successfully deliver projects.

PROFESSIONAL EXPERIENCE

Freelance | FullStack Developer

Jan 2024 – Present

Personal Project – AI Document Summarization Tool ([SumDocx](#))

- Developed a web application for automatic document summarization (PDF, Word, text) using artificial intelligence, with an integrated chat feature.
- Built with React.js, Python, Firebase, and Gemini API.

Project: QE

- Developed a high-performance platform enabling medical students to optimize their learning and exam preparation through an intensive training system based on MCQs and structured educational resources.
- Built with React.js and Supabase.

Project: Edumind

- Developed an educational mobile application that allows parents to book qualified babysitters offering integrated learning experiences for children.
- Built with React Native and Firebase.

Front End Developer

May 2022 – Dec 2023

Smart Team Company | Tunis

- Maintained and upgraded a SaaS system, using JSP, HTML5, CSS3, Bootstrap, and JavaScript
- Optimized system performance and assisted internal users with operational issues
- Debugged and resolved application issues to ensure a seamless user experience
- Provided documentation and technical assistance to non-technical staff
- Participated in code reviews, providing constructive feedback and ensuring adherence to best practices

Front End Developer

Oct 2020 – Mar 2022

Lezarts Digital | Tunis

- Developed a customer-facing web application for an Internet Service Provider in Tunisia using ReactJS, ensuring interactive and responsive UI/UX across desktop and mobile devices
- Implemented dynamic components, state management, and reusable modules to enhance performance and maintainability
- Collaborated closely with backend developers to integrate RESTful APIs and optimize data flow
- Ensured cross-browser compatibility and adherence to modern front-end development standards
- Actively engaged in code reviews to maintain code quality and consistency across the team
- Collaborated with the backend team to implement and integrate web services

Sirat | Tunis

- Developed a secure electronic invoicing platform using Java, Spring Boot, and React JS, including legally compliant digital signature integration
- Implemented SQL queries for reporting, data validation, and performance optimization
- Collaborated with internal teams to ensure system availability, reliability, and user satisfaction
- Prepared detailed user guides and technical documentation to support application usage and maintenance

EDUCATION

National Engineering Diploma in Web and Multimedia Technologies 2019
Higher Institute of Computer Science and Multimedia of Sfax, Tunisia

Professional Bachelor’s Degree in Computer Science and Multimedia 2016
Higher Institute of Business Administration of Gafsa, Tunisia
